REQUIREMENTS TO THE ARTICLE DESIGN

From the author(s), 1 sole article and (or) 1 article in co-authorship are accepted for consideration. The maximum authors number- no more than 3 persons.

The material for publication must have scientific novelty and be unique (it must be unpublished in any print media).

The percentage of allowable borrowings (the obligatory text quoting with links) from borrowed or personal works shall be verified by the plagiarism search program, and must not exceed 30% (<https://www.antiplagiat.ru/>). The presence of borrowing that violates the principles of academic ethics results in the immediate rejection of an article without the right to retry.

THE TEXT DESIGN DEMANDS:

A4 page format, portrait orientation.

Font type – Times New Roman, size – 14, line spacing – 1.

Text margins: upper, lower, right, left - 20 mm, manual hyphenation is not allowed.

Article volume: the amount of characters, including interword space, punctuation, numbers and other characters - at least 14,000, but not more than 20,000 characters.

Abbreviations and acronyms are decrypted after first usage.

The text should contain links to the graphical units and used tables.

Graphical units and tables should have: sequence numbering (if any), title, in case of borrowing the link to the author work is obligatory.

ARTICLE'S STRUCTURE:

1. Index of UDC (Universal Decimal classification).

2. Author (s) surname and abbreviated first name, place of work or study, academic degree and academic title.

3. The article title. It should be brief and reflect the core idea of the performed research.

4. The annotation, which should clearly state the article idea and be suitable for being performed separately from the main article. Volume - 100–150 words.

5. Keywords. The minimum volume - 8 keywords. Keywords and phrases are separated by a semicolon. Abbreviations or acronyms are not allowed.

6. Introduction. A brief review of the project literary sources should be given, as well as the purpose of the project and its relationship with an actual scientific areas indicated. The introduction should be clear and free of specific terms and meanings overuse.

7. The main body. The section should contain a description of the methodology, objects of research and highlight the research content. The final results are discussed from the point of their scientific novelty and compared with the corresponding data. The main body can be divided into subsections (with explanatory headlines) and include an analysis of actual publications, resolving issues related to these subsections.

8. Conclusion. The achieved results should be formulated abstractly, with their novelty, advantages and potential mentioned.

9. The list of sources includes 2-3 links from top national and foreign publications, as well as couple of links to their projects (if there are any) to demonstrate the research depth. The list of sources does not include the information that has not a certain author: law acts, benchmarks (including GOST), articles from dictionaries and encyclopedias, websites, etc. If necessary, all links are performed as text footnotes. Design according to the recommendations of the Higher Attestation Commission of Belarus (<http://www.vak.gov.by/bibliographicDescription>), alignment in width, without indentation.
